
C++ Software Development for Microsoft® Windows®

Company Overview

S5 Development LLC specializes in producing software solutions for the Microsoft Windows Platform. We specialize in designing and developing task specific software solutions for large corporate clients as well as the broad needs of small businesses. Our products are tailored to meet our customer's requirements and to easily integrate into existing business processes. All our developers are highly experienced specialists with academic degrees in mathematics and computer science. The main programming language is Visual C++.

Location

We are located in Novosibirsk, the third largest city in Russia and one of the major centers for science and technology in the country. Situated in the Siberian Scientific Center we have a large resource pool of highly qualified specialists with up-to-date knowledge from Novosibirsk State University and the numerous research institutes of the Siberian Branch of the Russian Academy of Sciences.
